Subject Hough Station - Centerpoint Property

<<Hough Centerpoint Complete SOW 2007-08-30.pdf>>

Several weeks ago I asked you if you had an objection to "chasing" contamination from the Hough Property east onto the Centerpoint Property. You will recall that there was a river slip between the two properties that was filled in after plant operations. The ½ of the slip on Crowley's property appears to have tar residues at depths up to 28' and the work plan calls for the removal of the materials.

While no investigation has been completed on the ½ owned by Centerpoint, we'd like to investigate and if necessary remediate while working under the TC order if we can get Centerpoint to agree. If Centerpoint will not agree to access we will be installing a sheet pile wall at the Crowley/Centerpoint property line and taking action under the original SOW you received with the order.

Our attorney has contacted your counsel asking if the attached scope of work can be added to the TC order so that we may do the work. Peter Felitti is OK with including it if you and Tim concur.

Please advise if it's OK. If you'd like to discuss this further please call me at (312) 240-4560.
